

Joint Closure T

**Part no.**

11100191

Line joint

Joint Closure T is foremost intended for line joints with the possibility of branching. Joint Closure T has three open holes for customer adaptation and is delivered without end plugs or bushings which are selected separately. The closure is equipped with cable strength member clamps, splice protectors and cassettes. Joint Closure T is available in three different sizes, depending on the total number of fibres to be spliced and the number of fibres per cassette.

The number of fibres will determine the number of cassettes, please choose a suitable joint closure for your fibre cables as specified in the table below. Brackets for attachment on walls, racks, in manholes or on poles, are available as options. Together with a locking cap the closure can easily be locked with a padlock.
